

Sure, here are the steps to fix the issues in Ubuntu Linux: 1. ****Open command prompt****: Create a new command prompt (Ctrl + Shift + P) in the terminal application. 2. ****Create a new account****: Enter the username and password for the Ubuntu-17-current and Ubuntu-16.10 respectively. 3. ****Login to the Ubuntu-17-current account****: Click on the "Sign in" button in the upper-right corner of the terminal application. 4. ****Verify your username and password****: On the login screen, enter your username and password in the fields. Make sure to replace them with the ones you are using in your Ubuntu-17-current system. 5. ****Open your web browser****: Once you are logged in, you can access the Ubuntu-17-current and Ubuntu-16.10 system. Now, you should be able to access your Ubuntu-17-current and Ubuntu-16.10 system from the command prompt.
